ABSTRACT

This report presents basic data on total enrollment in institutions of higher education in the fall of 1970. The charts show trends in opening fall enrollments by: (1) institutional control, (2) sex of student, and (3) level of institutions, fall 1963 through fall 1970. In addition, a comparison is made of opening fall enrollments, and percentage distribution by level of institution for fall 1963 and fall 1970. The tables present data on: (1) trends in opening fall enrollment by sex, institutional control, and enrollment category (first-time students and all students), fall 1963 through fall 1970; (2) opening fall enrollment by sex, attendance status, enrollment category, and institutional control and level, fall 1970; (3) opening fall enrollment by sex, attendance status, and state for all institutions, and by level and control of institutions, fall 1970; (4) opening fall enrollment of first-time students by sex, attendance status, and state for all institutions, and by level and control of institution, fall 1970; and (5) opening fall enrollment by institutional control and level, enrollment category, sex, attendance status, state, and institution, fall 1970. FOREWORD

This report for f.ll 1970 marks the twenty-fifth year for which opening fall enrollment in institutions of higher education has been reported by the U. S. Office of Education.

Again, as in 1969, fall enrollment data were collected on two separate survey questionnaires. The first, on which this report is based, was a very limited survey aimed at making opening fall enrollment data available early in the school year, with a more precise and detailed report to follow later.

The two principal categories for which early data were collected are (a) total resident and extension enrollment and (b) first-time resident and extension enrollment, tabulated by sex and by attendance status (full-time or part-time). Because final figures were not yet available for a large number of institutions--which were encouraged to use estimates to the extent necessary--readers should consider all figures to be preliminary. The institutions were willing to supply early estimates because they had the opportunity to refine or correct their enrollment counts for the later enrollment survey Opening Fall Enrollment in Higher Education, 1970--Supplementary Information. The report on the more detailed supplementary questionnaire will be published later.

For the extraordinary effort by many institutional representatives and State coordinators who supplied data so promptly, the Office of Education expresses its warmest appreciation.

INTRODUCTION

This publication is the final report on the survey Opening Fall Enrollment in Higher Education, 1970--Basic Information. As in 1969, enrollment data for fall 1970 were collected on two separate questionnaires--the brief form on which this report is based and a longer, more detailed form Opening Fall Enrollment in Higher Education, 1970--Supplementary Information (see appendix). Reports on both the 1969 and 1970 supplementary surveys will appear later in separate publications.

Data from the 1970 "basic" survey have previously been released in two preliminary reports with limited distribution. This report includes both summary tables and an institutional listing. A single report with summary tables but no institutional listing was published for the comparable 1969 survey. 1/ In 1968 there was a single opening fall enrollment survey, but the summary tables and two institutional listings were published in two separate reports. 2/

The questionnaire form used for Opening Fall Enrollment, 1970--Basic Information was exactly the same as that used for 1969. Also, for the benefit of users comparing 1969 and 1970 enrollment data, and in order to speed up production of the tabulations used in the preliminary reports, the same tables as those used in the 1969 report were again produced for the 1970 survey. This report presents basic data on total enrollment in institutions of higher education. It includes all students in programs chiefly creditable toward a bachelor's or higher degree, as well as those students in organized occupational programs in vocational or technical education of more than 1 but less than 4 years that are not chiefly creditable toward a bachelor's or higher degree. The only subcategory of enrollment included in the questionnaire was for students who were in college for the first time. Subtotals by sex and by attendance status (full-time or part-time) are also provided.

The completed "basic" questionnaires were due on October 15; 100 percent response was accomplished by November 4, a considerably earlier date than had been attained for opening fall enrollment for many years. Additional manpower resources were applied to the followup

campaign to achieve this relatively early completion date so that published data could be made available to the educational community before the end of November. However, in order to meet this schedule, the colleges and universities were pressed more than usual to provide enrollment figures. Therefore, the reader should be aware that a large but unknown number of institutions in their extra effort found it necessary to make at least partial estimates in order to obtain enrollment figures, all of which should be considered preliminary. Also, because of the accelerated processing schedule, five institutions were inadvertently omitted from the preliminary reports on this survey; they are included in this report, however. 3/

The Education Directory, Higher Education, 1969-70 (OE-50000-70) was the source for the list of institutions included in the survey on which this report is based, with such changes in the fall of 1970 as were known at the Office of Education.

Classification of Institutions

Institutions of higher education in this report are classified either as 2-year or 4-year institutions, with universities broken out as a separate subgroup of the latter category. At any given time there might be a number of institutions converting from one category to another; such institutions are classified in their new category in the fall subsequent to official notification of the change in their status. The 4-year institutions are those that offer programs extending at least 4 years beyond high school. They comprise all institutions that grant bachelor's or higher degrees or some recognition equivalent to such degrees (e. g., ecclesiastical recognition in a theological institution). They may also offer organized occupational programs of less than 4 years that result in an associate degree or some other recognition of completion such as a certificate or diploma.

The numbers of institutions in the fall 1970 survey and, for comparison, the 1969 survey were as follows:

3/ Parkland College (Illinois), Hood College and Johns Hopkins University (Maryland), Hampshire College (Massachusetts), and Reformed Theological Seminary (Mississippi).

Questionnaire Editing

Each report received in this survey was compared with the report filed by the same institution for the survey Opening Fall Enrollment in Higher Education, 1969--Supplementary Information. Large differences in enrollment figures were accepted if the reasons for the differences were readily apparent. Where necessary, respondents were consulted by letter or telephone for verification or corrections of the figures reported.

For the convenience of the reader as well as to facilitate statistical tabulation, totals have not been rounded but are presented as they were obtained by simple addition of the figures provided by individual institutions. Notwithstanding the care and effort with which the data were compiled by the registrars and reviewed by the Office of Education, aggregated data are not represented as being accurate to the last digit.

Comparisons With Enrollments in Recent Years

The annual rate of growth for total enrollment advanced from the 5.4-percent increase reported in 1969 to 7.4 percent for 1970, although this was still somewhat below the growth rates of pre-1969 years (see table 1). Even more noteworthy is the reversal of the downward trend of enrollments in privately controlled institutions of higher education--however modestly (up 2.5 percent)--after 2 consecutive years of decline.

Within the private sector, the 2-year institutions did not share the increase in enrollment experienced by the universities and other 4-year institutions but followed their 14.4-percent decrease in 1969 with a further decrease in 1970 of 2.5 percent. However, taking such increases and decreases in enrollment at face value bears with it the element of some risk. For example, if certain institutional changes had not taken place between 1969 and 1970, [4/] private 2-year colleges would not have shown a 2.5 percent decline in enrollment; rather, they would have had an increase in enrollment of 3.5 percent resulting from an absolute increase in enrollment of 4,508 students. This entire increase was

nullified, however, because changes in the institutional population (primarily the reclassification of 12 institutions from 2-year to 4-year) had the effect of transferring 7,676 students from the private 2-year sector to the private 4-year sector.

The proportion of total enrollment accounted for by public institutions continued a long-term trend by increasing to 74.9 percent in fall 1970, compared to 73.7 percent in 1969 and 72.2 percent in 1968. Women students comprised 41.4 percent of total enrollment, also a continuation of a steady upward trend of long duration. Full-time students constituted 68.7 percent of total enrollment, down slightly from the 69.3-percent level of the past 3 years. Enrollment of first-time students topped 2 million for the first time--increasing by 6.0 percent from fall 1969 to fall 1970.

For the second straight year--and for the third time in the last 4 years--the rate of increase in the enrollment of first-time students was less than the rate of increase in total enrollment. The exception was 1968. An explanation for the unusually high rate of increase in first-time students compared to the increase in total enrollment in 1968 can be found on page 3 of Opening Fall Enrollment in Higher Education, 1969: Report on Preliminary Survey. Setting aside 1968, there are a number of circumstances through which total enrollment can increase without an increase in enrollment of first-time students in the fall term; for example, (1) the proportion of students enrolled for advanced degrees is growing; (2) more college freshmen are beginning in the summer, rather than waiting until the fall term, which excludes them from the ranks of first-time students in Opening Fall Enrollment surveys; (3) more students are extending their bachelor's programs beyond the normal 4-year period, thereby contributing to a greater proportion of returning or continuing students; and (4) more and more schools are converting from a semester to a quarter system, which gives the student an additional term in which to become a first-time student.

4/ These institutional changes resulted in a net decrease in the number of private 2-year colleges from 253 in 1969 to 238 in 1970. This net reduction in the number of private 2-year institutions derived from the following changes: One institution merged with a private 4-year institution, seven were closed, three were dropped for failure to meet minimum criteria for inclusion in the survey universe, and 12 were reclassified as private 4-year institutions, for a total gross reduction of 23. Offsetting the losses somewhat were the addition of seven new institutions and the reclassification of a private 4-year institution to a private 2-year institution, for a total of eight additions. The net reduction thereby came to 15 institutions.

1/ Aggregate United States includes the 50 States, the District of Columbia, U. S. Service Schools, and outlying areas.

2/ Includes students whose programs of work consist wholly or chiefly of work normally creditable toward a bachelor's or higher degree plus students in programs requiring 1, 2, or 3 years of college work which are designed to prepare for immediate employment rather than as the first 1, 2, or 3 years of a bachelor's degree program.

3/ All figures for 1969 and 1970 should be considered preliminary, although no significant changes in numbers or percentages are anticipated when final counts become available.

4/ Readers should be reminded that although enrollment does change every year, so does the number of institutions accounting for this total enrollment. Accordingly, the numbers of institutions in each year for which enrollment data are shown in the table are as follows: 1970 - 2,565; 1969 - 2,536; 1968 - 2,495; 1967 - 2,382; 1966 - 2,337; 1965 - 2,238; 1964 - 2,183; 1963 - 2,140.

5/ A first-time student is defined as a new freshman (in the fall term) who has never previously been enrolled in an institution of higher education. First-time students are included in the appropriate "total, all students" counts. Data for first-time students for years prior to 1966 are not com comparable since they include only first-time students in programs chiefly creditable toward a bachelor's degree.

REPRODUCTION OF SURVEY REPORT FORMS

GENERAL INSTRUCTIONS

NOTE: Data acquired in this survey will be published in listings by individual institutions.

Please fill out a separate form for the main campus and for each branch or other campus. Do not fill out separate forms for extension CENTERS. Extension students should be reported on the form for the main campus. Please mail this form to the U.S. Office of Education as soon as enrollment becomes stabilized, but by October 15, 1970, if possible.

Please read instructions below before completing this form. If you need additional clarification on any item, please call Mr. George H. Wade, (202) 962-7301 in Washington, D. C.

If exact counts are lacking for a group that should be reported, please include an estimate for that group.

Make sure entries in Columns 1 through 4 add to totals in Column 5.

Do not include in this report:

(a) Students in noncredit adult education courses.
(b) Students taking courses at home by mail, radio, or television.
(c) Students enrolled only for "short courses".
(d) Auditors.
(e) Students studying abroad.
(f) Students in any branch campus or extension center in a foreign country.

SPECIFIC INSTRUCTIONS

LINE 1. Include resident and extension students taking work normally creditable toward a bachelor's or higher degree AND students in organized programs of less than four years NOT chiefly creditable toward a bachelor's degree. Include "special" or "unclassified" students taking such work regardless of intention concerning a degree, diploma, or certificate. Students to be included may be enrolled on campus or at extension centers, studying during the day or evening, enrolled at the undergraduate or postbaccalaureate level. Living quarters *(on campus or off)* and legal domicile are irrelevant.

LINE 2. Include those students already reported on Line 1 who are enrolled in your institution for the first time this fall and have never been enrolled in any other institution of higher education. Include as first-time students those admitted this Fall under "advanced credit" or "advanced placement" plans who received some credits through examinations, test scores, etc., if they have never previously been enrolled in an institution of higher education. Exclude from the first-time group students who enrolled in Summer 1970 and all students entering your institution as transfers.

COLUMNS (1) and (3). Count as full-time students those carrying at least 75% of a normal student-hour load. For graduate students, this means at least 75% of the academic load in course work or other REQUIRED activity *(such as thesis, research, or teaching)*.

One additional category of information is being requested this year that was not included on last year's form: the full-time equivalent enrollment *(column 6)* for each headcount total in column 5.

Please enter in column 6, on the appropriate line, the full-time equivalent which you may have already calculated for any of the corresponding headcount totals in column 5.

If you have not previously calculated full-time equivalent enrollment, the following method is suggested:

> ADJUSTED HEADCOUNT METHOD – Full-time equivalent enrollment equals the headcount of full-time students plus one-third the headcount of part-time students.

You may use the above method or any other method of calculating full-time equivalent enrollment most appropriate and/or convenient to your institution. If you do not calculate full-time equivalent enrollment figures, the U.S. Office of Education will make the calculations, using the "Adjusted Headcount Method."

UNDERGRADUATES							
LOWER DIVISION *(Freshmen and sophomores) (See also line 13. An entry on this line normally will require an entry on line 13)*	1						
UPPER DIVISION - Students who have completed the sophomore year and typically are enrolled in a 4 or 5-year bachelor's degree program. Students in professional programs of 6 or more years should generally be included in line 5.	2						
TOTAL DEGREE-CREDIT UNDERGRADUATES *(Sum of lines 1 and 2)*	3						
UNCLASSIFIED STUDENTS - Not candidates for a degree, diploma, or certificate, or equivalent award, although taking courses in regular classes with other students; this category also includes students who cannot be classified by academic level *(undergraduate, first professional, graduate)*	4						
FIRST-PROFESSIONAL STUDENTS - Students enrolled in a professional school or program which required at least two or more academic years of college work for entrance and a total of at least 6 years for a degree. Students in programs requiring only 4 or 5 years beyond high school should be reported as undergraduates. All students enrolled in work leading toward a master's degree are to be reported as GRADUATE.	5						
GRADUATE STUDENTS - Students who hold the bachelor's or first-professional degree, or equivalent, and are *(or might be)* candidates for a master's or higher degree.	6						
TOTAL DEGREE-CREDIT RESIDENT STUDENTS *(Sum of lines 3 thru 6)*	7						
EXTENSION STUDENTS -- Extension students are not defined uniformly in all institutions. Most commonly it means face-to-face instruction in centers or places away from the main campus or branch campuses. It may also include on-campus instruction offered by an extension division. Extension centers differ from branch campuses in that students are not counted as resident students. Note that only credit extension enrollment is requested *(i.e., enrollment in courses creditable toward a degree, diploma, certificate, or other formal award)*. Enrollment in interest courses, short courses, noncredit adult education courses, and other community-type programs not creditable toward such an award are to be excluded even though they may be offered under the auspices of the extension division.
